Turn In Early: Quilting an all-over design, such as a paisley meander, is perfect when you need to just get the quilt finished. You can adjust the size of the design to make the quilting as dense as you'd like. In the Wallflower quilt, I quilted the paisley meander in all of the Irish chain blocks.

Up All Night: Experiment with several different versions of the continuous curve design to add a little more pizzazz to your quilting. Travel along the seams if you find yourself stuck in a corner. The square in the center of the block is large enough for a swirly feather, which pulls all the quilting together. Even though these designs are more complex than just an all-over design, it can still be quilted fairly quickly.
