Plywood L-fence, $3 / 4$ " thick. Make 2" longer than desired radius of arc.

## CIRCLE JIG

Cut $90^{\circ}$ mouth on bandsaw

Drill $1 / 4$ " hole with counterbore to provide

Straight-grained hardwood,
$3 / 8^{\prime \prime} \times 3 / 4^{\prime \prime} \times 12^{\prime \prime}$ (or to fit the saw's
miter groove so it sits
below the table surface and slides freely back and forth)
